SITUATION SUMMARY

2017 Statewide Winter Storms

Cal OES Coastal Region

Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge. The bridge has been demolished so the road is closed and estimates for some access from the north is late September 2017.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.
- Pfeiffer Big Sur State Park will reopen to the public on 07/01/17 after an 11-month closure due to the Soberanes Fire and winter storms.
- Julia Pfeiffer Burns State Park, Andrew Molera State Park, and Highway 1 at Pfeiffer Canyon Bridge remain closed.

Paul's Slide, State Route 1, Monterey County

Per Cal OES Coastal Duty Officer (CDO), as of 1300 hours on 05/25/17, Paul's Slide on State Route 1 has been closed to all traffic.

- Caltrans engineers report slide activity and the area has been closed in the interest of public safety.
- Assessment will commence and further details will be provided once released.

Mud Creek Slide, State Route 1, Monterey County

The Mud Creek area on State Route 1 sustained a major slide on the evening of 05/20/17, when over a million tons of rock and dirt fell down the slope continuing down to the ocean floor 250 feet off the shoreline.

- The remaining slide now extends 1,500 feet in length over State Route 1 and is about 35 to 40 feet deep.
- Estimated opening date is 06/01/18.

CDPH Zika Virus Disease Update

Executive Summary

The Medical and Health Coordination Center (MHCC) continues to be activated in response to Zika virus disease. The California Department of Public Health (CDPH) and Emergency Medical Services Authority (EMSA) are currently the only Emergency Function 08 (EF 08) partners at the state level reporting on this activation.

The MHCC is coordinating with EF 08 partners, healthcare facilities and local health departments (LHDs) to ensure responses to inquiries are timely and accurate.

CDPH and EMSA Duty Officer Programs are monitoring Zika virus disease after hours and communicating with the Regional Disaster Medical and Health Coordination (RDMHC) and the Medical Health Operational Area Coordination (MHOAC) Programs throughout California.

As of Friday, July 7, 2017, there have been 573 travel-associated Zika virus infections in California. This number reflects an increase of 12 from the 561 cases reported on the last situation report dated June 29, 2017. CDPH centers and programs continue to monitor Zika virus disease and provide information to the MHCC related to their specific activities on a weekly basis.

Please see attached for full report.

WEATHER OF CONCERN

Weather of Concern

- A chance of thunderstorms over the Sierra Nevada in Tulare County as well as the mountains and desert of Kern County today and early evening. In addition to dangerous cloud to ground lightning, thunderstorms can also be accompanied by briefly heavy rain, gusty winds and small hail.
- **Active Weather Warnings, Watches and Advisories by County:**
- http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php - Temporarily unavailable.
- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

The 4 Corners area high will begin migrating back to the west today for the start of a warming trend. Isolated afternoon and evening thunderstorms are expected further north along the Sierra today, and some of those storms may occur around Lake Tahoe southward. Afternoon high temps across the Northern California region will be close to those experienced Thursday.

The 4-Corners high will push westward even more so Friday and hang over the region with rather hot, mostly dry weather this weekend with the warmest inland areas around 107. The chance of isolated afternoon and evening thunderstorms will increase a bit over the NW mountains and eastern areas near the NV border Friday and linger in those areas Saturday. The thunderstorms will likely produce a mix of wet and dry lightning. Drier SW flow and less chance of thunderstorms is expected Sunday as an off shore low pressure trough approaches the coast with the most favored thunderstorm area possibly the NW mountains. The mentioned low pressure trough will enter the region Monday and a chance of isolated afternoon and evening thunderstorms will linger over the NW mountains. The trough will linger next week with seasonable temperatures and minimal thunderstorm chances in place.

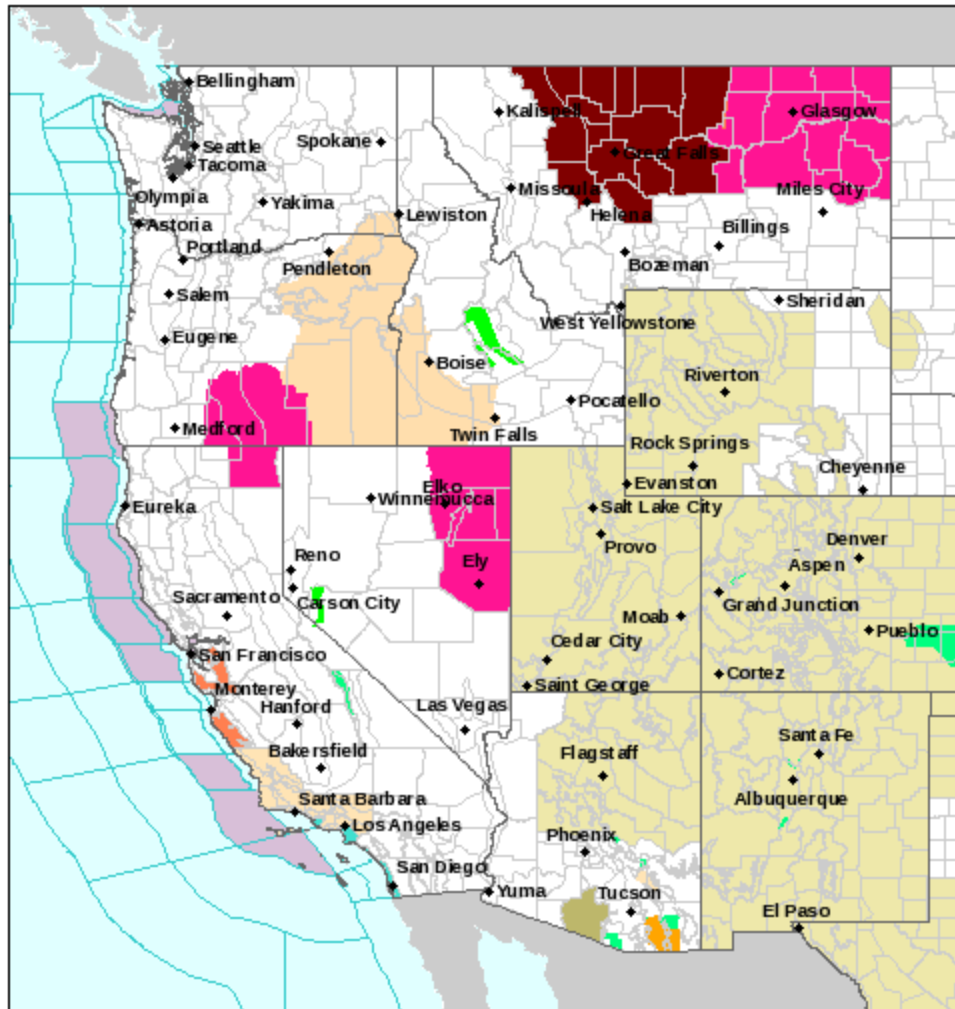

Strong winds will be at a minimum through the weekend, although a noticeable increase in SW afternoon wind speeds is likely Sunday. The marine layer may become a bit more shallow over the weekend, but there will still be persisting overnight and morning low cloudiness, especially north of Cape Mendocino as is seasonably common.

SOUTHERN CALIFORNIA

Hot temperatures, scattered storms this weekend ***North winds possible in Santa Barbara County Friday night/Saturday morning***

A strong ridge of high pressure is expected to bring a return of hot, humid weather this weekend. But today will continue to be relatively mild with highs 3-5 degrees above seasonal averages. Isolated thunderstorms may occur near the Sierra Crest this afternoon, but they should be very few in number. Friday, temperatures will begin to climb, and by the weekend, highs will be up to 105 in the valleys and lower foothills. The San Joaquin Valley will see readings close to 110 with desert temperatures up to 115. Southeasterly flow will direct some monsoonal moisture into the region and scattered wet thunderstorms will be possible this weekend into Monday, primarily from the eastern side of the San Bernardino and Cleveland N.F.'s into the desert south of I-15. The best chance of storms may be on Sunday when storm coverage may expand to include the Sierras and as far west as Ventura County. No storms are expected along the central coast and Santa Barbara County. Surface gradients will trend northerly which will result in northwest afternoon winds of 15-25 mph along the central coast this weekend. North winds of 10-20 mph with gusts over 30 mph may develop Friday night and again Saturday night in Santa Barbara County. Temperatures will remain warm with poor RH recovery in this region during the overnight hours this weekend. Hot weather with scattered storms will continue into Monday, but a developing trough is expected to sweep the moisture from the region next Tuesday. Temperatures should return to near normal by the middle of next week as onshore flow becomes reestablished.

EMAC and Public Assistance - 2017 Winter Storms

- Cal OES Recovery Division identified the need for Public Assistance subject matter experts to assist with the aftermath of the 2017 Severe Winter Storms. Accordingly, Cal OES requested assistance from other states through the Emergency Management Assistance Compact (EMAC) - the Nation's mutual-aid system. New Jersey and Colorado provided personnel that arrived on Monday, 06/13/17. Both states along with other potential states will be providing support between now and the beginning of September at various Joint Field Offices throughout California. The goal is to assist those impacted counties in identifying disaster related damage and program eligibility.
